| TARGET MARKET | | |
|---|---|---|
| **Client type** | | Retail<br>Professional clients / counterparties<br>Eligible Counterparties |
| **Knowledge and experience** | | **Advanced investor**: Investors having at least one of the below characteristics:<br><br>Advanced knowledge of relevant financial instruments and transactions<br><br>Frequent trading activity or investment holdings with exposure to high-risk or complex financial instruments<br><br>Relevant financial industry experience. |
| **Financial situation, with a focus on the ability to bear losses** | | **Total capital loss:** This product is not principal protected and is targeted at investors who are comfortable with taking the risk of losing 100% of the Issue Price paid and who are willing to take exposure to the credit risk of the Guarantor of the Instruments. |
| **Risk Tolerance and compatibility of the risk/reward profile of the product with the target market:** | | **High:** investors are likely those who may find products with the highest levels of market risk, credit risk and/or liquidity risk appropriate when Low and Medium risk tolerance investors would not. |
| **Clients' objectives and needs** | **Investment Tenor:** | **Hold to maturity:** Investors should intend and have the ability to hold this product for the full term.<br><br>**Long term:** The Instruments are not intended to be short term trading instruments and are targeted at investors who have a long term investment horizon and who do not need access to their investment for the duration of the product and who are comfortable with being invested for such duration. Investors should be prepared to hold their Instruments for the full term and understand that there will not be a liquid secondary market for the Instruments.<br><br>**Early termination feature: Y**<br>**Recommended holding period 10 years and 5 days** |
| | **Investment Objective:** | **Non-Protected Growth:** The target market for this product is investors seeking a product that offers a potential return at maturity or expiry (as applicable), depending on the performance of the Reference Items. Capital is at risk at maturity or expiry (as applicable) if the Reference Item close below a certain level. Because of the additional risk to capital, the potential return on offer from Non-Protected Growth products should be greater than that from Protected Growth products. |
| | **Sustainability Objective:** | This product does not have a sustainability related objective. |
| | **Liquidity:** | There may not be a liquid secondary market for the product. |

| | | |
|---|---|---|
| | **Needs:** | Investment<br><br>**Diversified Portfolio:** investors are likely to be seeking an investment product that in conjunction with a broad array of other investments meets a variety of needs including providing diversified market investment exposure and diversification from credit risk. By virtue of their other investments they will correspondingly have a reasonable level of investment experience arising from making such other investments. |
| **Negative Target Market:** | | ***Knowledge and Experience***<br>**Basic Investor:** investors having basic knowledge of relevant financial instruments (they can make an informed investment decision based on the offering documentation and/or with help of distributor point of sale's advice) & having limited experience of relevant financial products (suits for first time investor).<br><br>***Financial situation, with a focus on the ability to bear losses***<br>**No capital loss**: investors looking for a product that is principal protected at maturity or expiry (as applicable) only and who are willing to take exposure to the credit risk of the Guarantor of the Instruments.<br><br>***Purchaser /Distribution Strategy***<br>**Execution-only channel** to Retail (non-advised).<br><br>***Clients' needs***<br>**Stand-alone basis:** investors that are likely to be seeking a single investment product that meets a variety of needs including diversified investment exposure, wealth preservation and financial strength. |
